

Abhishek Rajendra Yadav

Data Science & Machine Learning | Python · SQL · Deep Learning

abhishek.r.yadav20@gmail.com | LinkedIn | GitHub

SUMMARY

Data Science postgraduate (M.Sc.) with 3 years of professional experience in healthcare sales at Thyrocare Technologies. Skilled in Python, Machine Learning, Deep Learning, and Data Analysis, with hands-on project experience spanning healthcare, environmental, and business analytics domains. Seeking an internship or entry-level role to apply practical skills on real-world problems.

WORK EXPERIENCE

Sales Executive | Thyrocare Technologies Pvt. Ltd. | Aug 2020 – Jul 2023

Managed B2B & B2C healthcare sales in the diagnostics sector, building client relationships and driving revenue growth across assigned territories.

EDUCATION

M.Sc. – Data Science & Big Data Analytics | 2023 – 2025

B.Sc. | 2016 – 2019

PROJECTS

- **Hospital Readmission Prediction Model** [Machine Learning] [GitHub]

Built a classification model to predict hospital readmissions using patient records. Applied feature engineering, cross-validation, and hyperparameter tuning to optimise model performance.

- **Air Quality Prediction** [Machine Learning] [GitHub]

Developed regression models to forecast air quality indices from environmental sensor data. Used EDA, feature selection, and ensemble methods for improved accuracy.

- **Medical Insurance Cost Prediction** [Machine Learning] [GitHub]

Predicted medical insurance charges based on demographic and lifestyle features using linear and ensemble regression techniques with detailed EDA.

- **Netflix Recommendation System** [NLP / Recommender Systems] [GitHub]

Built a content-based recommendation system using NLP (TF-IDF, cosine similarity) on Netflix catalogue metadata to suggest relevant titles to users.

- **Crime Prediction System** [Machine Learning] [GitHub]

Designed a predictive model to identify crime-prone areas and categories using historical crime data, geospatial features, and classification algorithms.

- **Global Superstore Analysis** [Data Analytics / Visualisation]

Performed end-to-end exploratory data analysis on a global retail dataset. Derived insights on sales trends, regional performance, and profitability using Pandas, Matplotlib, and Plotly.

SKILLS

Languages: Python · SQL · R

ML / DL Libraries: Scikit-Learn · TensorFlow · Keras · NLTK

Data & Visualisation: Pandas · NumPy · Matplotlib · Seaborn · Plotly

ML Techniques: Supervised & Unsupervised Learning · Cross-Validation · Hyperparameter Tuning · ANN · CNN · Transfer Learning

Other: EDA · Statistics · NLP · Feature Engineering

CERTIFICATIONS

- AI Externship – Google Developers / SmartInternz [Certificate]
- Machine Learning – L&T EduTech [Certificate]
- Deep Learning – L&T EduTech [Certificate]
- Practical Approach to Data Mining & Analytics – tcSiQn [Certificate]
- Enterprise Data Science in Practice Badge [Certificate]
- Getting Started with Enterprise-Grade AI Badge [Certificate]
- Data Science – CODE ALPHA [Certificate]
